

PT. MAJU SELARAS INSTRUMINDO
Supplier, Service Environment Laboratory & Industrial Instrument

CERTIFICATE OF ATTENDANCE

No. 004/S-MSI/VI/2026

**Fundamentals and Applications of
Isokinetic Sampling Methods**

This Certificate of Attendance is Presented to

Billy Shultan Al Hadiy

Held on 20 - 21 June 2026

Tangerang, 21 June 2026

Andhesta Tangari Y.

Instructor

Sulaiman Asmad Syafe'i

Director of PT Maju Selaras Instrumindo

Training Modules

Fundamentals and Applications of Isokinetic Sampling Methods

No	Module Day-1	Duration
1	Introduction to Air Emission Monitoring	1 hour
2	Fundamentals of Concentration and Particulate Measurement	1 hour
3	Overview of US EPA Stack Testing Methods	1 hour
4	Principles of Isokinetic Sampling	1 hour
5	Sampling Location and Traverse Point Determination (EPA Method 1)	2 hours
6	Stack Gas Velocity and Flow Rate Measurement (EPA Method 2)	2 hours

No	Module Day-2	Duration
1	Gas Composition and Moisture Determination, Isokinetic Sampling Equipment and Components	1 hour
2	Preliminary Calculations for Isokinetic Sampling, Preparation Before Sampling	1 hour
3	Sampling Train Assembly, Field Sampling Procedures (EPA Method 5)	1 hour
4	Data Reduction and Calculations, Quality Assurance and Quality Control (QA/QC)	1 hour
5	Hands-On Demonstration and Field Practice	3 hours
6	Case Study and Evaluation	1 hour
